

Preparing Your Poster for the Annual Meeting

Submissions chosen to be delivered as poster presentations for the NAPCRG 52nd Annual Meeting should be informative and productive.

DISPLAY FORMAT

The display is allocated an 88"x 37" board. Each panel should be prepared on heavyweight paper or lightweight cardboard, so they are easy to mount with velcro dots. Presenters are urged to design posters in whatever fashion they believe best describes the program component or activity. Remember that the presentation is primarily a visual one, and it is recommended presenters make maximum use of figures, graphs, diagrams, and flow charts on the panels used.

An abstract panel is not a necessary component of any type of poster presentation and is specifically discouraged. Your lettering for this information should not be less than one inch in height. Your audience will be standing from 3 to 6 feet away from the poster and the lettering should be easily legible from that distance.

Each individual panel in the display should be clearly numbered in the upper right-hand corner so that viewers can quickly determine the sequence to follow in viewing the individual panels in each presentation.

TIPS FOR PREPARING A POSTER PRESENTATION

The major components of an effective poster presentation include:

- Number each panel of your poster so sequence for viewing is clear to
- Be sure connection of ideas and progression of thought is clear from one panel of the poster to another.
- Use a minimum of text (a rule of thumb is that total length of text for a poster presentation should not exceed 25 lines).
- Use lists or phrases instead of complete sentences when possible.
- If an accompanying handout is needed for your poster presentation, label it clearly with the title of your

EDITORIAL ASSISTANCE AND ARTWORK PROCESSING

Assistance in submitting artwork and other necessary material for processing poster presentations should be obtained from the presenters' own facilities.

REVIEW/SUMMARY

An effective poster session:

- Can be read and understood easily from 3 to 6 feet.
- Has charts and tables that can be comprehended in 1 minute per page viewing time: no more than 4 rows and columns per table, no more than 3 components being graphed no 3-dimensional graphs, no double-Y-axis graphs.
- Has posters displayed as nearly at eye level as possible.

An effective poster presentation can be even more useful to its authors than an oral presentation. There is the opportunity for one-to-one discussion with viewers; the resulting feedback is frequently quite valuable.
